To whom it may concern:

Ref: Service and Repair of Sovereign Quantum Moisture Meters

Sovereign Chemicals (now part of the Bostik Group) specialises in products for damp proofing and renovation of older buildings built without damp proof courses, and for buildings where the damp proof course (DPC) has failed.

Sovereign Chemicals first commissioned the design of a non-destructive electronic moisture meter in the early 1980's for use by building surveyors in connection with the above. By chance, one of Sovereign's managers owned a yacht, and saw the opportunity for the Marine Moisture Master (pictured right) which was adapted from the Construction meter.

Sovereign has never designed or built its own moisture meters, but has bought them in from local electronics companies. Sandra Martin of Santronics who built Sovereign meters for many years has now retired. All repair and service work is now handled by Glasson Electronics Limited who can be contacted at the address below:

Mr Simon Bibby
Glasson Electronics Limited,
Brock House,
Nateby Technology Park,
