

Accessories for the Skipper V Marine Moisture Meter From Nigel Clegg Associates

The Tramex Skipper V has several optional accessories designed to get the best from your new meter, helping you get the job done quickly, efficiently, and safely.

Calibration Check Box:

Surveyors working alone often worry about the accuracy of their instruments, especially when weather conditions result in a series of unexpectedly high or low moisture readings. In most cases comparing readings with other surveyors' instruments only adds to the uncertainty.

To avoid such problems Tramex has made calibration check blocks available for their entire range of moisture meters so they can be quickly and easily checked for accuracy against the manufacturers' standards. These calibration blocks are very easy to use, and unlike timber are not affected by humidity.

However, please note that calibration check blocks do not replace periodic recertification where this is required by ISO or other bodies, and are specific to the instrument named on the block. These blocks are not usually interchangeable. For example, the Skipper V test block has very limited compatibility with older Skipper models.

Telescopic Extension Handle for the Skipper V:

The Bluetooth® connectivity of the Skipper V allows moisture readings to be displayed and recorded remotely, even when the meter itself is out of sight.

With a fully extended length of 76 cm (30") the lightweight Extension Handle E5-HBS takes full advantage of this functionality by making it easy to take readings around a metre above head height without ladders, or from decks without kneeling or bending down.

The Tramex Meters App:

The new Tramex Meters app allows you to capture, share and report all your moisture readings from Series 5 instruments. In addition to basic functions such as display mirroring the app can superimpose readings on photographs to provide moisture maps with geotagging using GPS data from your Android or IOS device. The app is free to download but requires Android 11.0, IOS 13.0 or later.

Price List (SSP)			
Description	Part No.	£ GBP	€ EUR
Tramex Skipper V Moisture Meter	SMM5	£460	€520
